

PROJECT NEWS

St. James Street

London, UK

St. James' Park is located in the downtown area of London and serves as a place of recreation and relaxation of citizens. St. James street is a high-class office building standing on the north side of the park.

While maintaining a dignified and magnificent outward appearance, the interior of the building has been renewed to modern office standards. The building is served by six elevators, four of which are open-hatch observation models installed in a bright atrium onto which outside light is falling. Both elevator cab and ceiling are made of full glass panels, and tempered glass is used for the entire landing doors. Users enjoy the smart design that gives a comfortable sense of openness.

Owner:

Chelworth Holdings Ltd.
